Art Unit: 1725

1. The specification is objected to under 35 USC 112, 1st paragraph in that it is written in a non-idiomatic expression such that renders the meaning vague and indefinite. For example, in page 2, lines 33-34, page 5, lines 12 and 15, page 7, lines 22 and 35, page 8, lines 9 and 23, page 9, line 5, respectively, it recites "superiorly and inferiorly", "inferiorly and rotatively", "superiorly affixed", "inferiorly and rigidly", etc. It is not clear what the meanings are. In page 12, line 11+, it recites that the axial columns 13 may carry a spacer 70 in the form of a tubular sleeve provided between the moveable block 12 and the locking means 15 and which will be seated against the two mold portions when the latter reach a certain minimum spacing larger than that corresponding to the respective closed mold positions. However, it is not clear how the mold can be in a closed position when the two mold portions are spaced at a spacing which is larger than the mold closed position. Applicant is required to correct these and other errors which might occur **throughout the specification**.

2. Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The reasons for the rejection are the same as the objection to the specification supra. Further, in claim 11, the reference numerals for the two mold portions shall be (10, 20), rather than (10a, 20a).

3. Claims 1-11 contain allowable subject matter and will be allowed upon the objection to the specification under 35 USC 112, 1st paragraph and the rejection to the claims under 35 USC 112, 2nd paragraph supra are overcome.
